

The Height & Confined Space Specialists

HEIGHT SAFETY TRAINING

Course Objectives:

This course has been designed to provide participants with a theory and practical knowledge of equipment requirements and safe working methods that can be adopted when working at heights. This course is suitable for persons who are required to work in such areas when there may be a risk of falling and those who may be required to act as standby personnel and manage or supervise persons working at heights.

Participants completing this course will:

Understand the legislative requirements detailed in the NSW OH&S Regulation 2001, Australian Standard 1891.4, Workcover Codes of Practice for Safe Work on Roofs Parts 1 & 2 and the operation of associated safety equipment.

Course Outline:

This course consists of lectures, demonstrations, tutorials and practical exercises including:

- * Legislative requirements
- * Hazard identification, risk assessment and control
- * Safe Working Methods - including:
EWP use, scaffolding, fencing, roof anchors,
and static lines.
- * Selection, use and maintenance of safety equipment including:
Harness and Lanyard Assemblies
Fall Arresters, Anchor Points
Safety Lines-Horizontal & Vertical
Descent Devices, Ladder Supports
Footwear and General PPE
- * Emergency Procedures

Assessment:

During the theory and practical components of the course, participants will be assessed on their knowledge and ability to perform the necessary tasks required for working safely at heights.

Certificate:

Upon successful completion each participant will be issued with a Statement of Attainment "Work Safely at Heights" National Course Code CPCCCM1006A in partial completion of the Training Package: Construction, Plumbing and Services Integrated Framework.

Note: Participants must be capable of undergoing moderate physical activity.
